Method	PUT
Authenticated	YES
Request Body	-----
Returns	{ id: user.id, name: user.name, email: user.email, status: user.status }
On Error	400/404

Resource	/admin/suspend/(:id)
Method	PUT
Authenticated	YES
Request Body	-----
Returns	<pre>{ id: user.id, name: user.name, email: user.email, status: user.status }</pre>
On Error	400/404

Resource	/admin/restore/(:id)
Method	PUT
Authenticated	YES
Request Body	-----
Returns	<pre>{ id: user.id, name: user.name, email: user.email, status: user.status }</pre>
On Error	400/404

Resource	/admin/delete/(:id)
Method	PUT
Authenticated	YES
Request Body	-----
Returns	<pre>{ id: user.id, name: user.name, email: user.email, status: user.status }</pre>
On Error	400/404

Resource	/api/login
Method	POST
Authenticated	NO
Request Body	-----
Returns	<pre>{ token: <token> }</pre>
On Error	400/404

Resource	/api/users
Method	POST
Authenticated	NO
Request Body	-----
Returns	<pre>{ id: user.id, name: user.name, email: user.email, status: user.status }</pre>
On Error	400/404

Resource	/api/user/(:id)
Method	PUT
Authenticated	YES
Request Body	-----
Returns	<pre>{ id: user.id, name: user.name, email: user.email, status: user.status }</pre>
On Error	400/404

Resource	/api/user/(:id)
Method	GET
Authenticated	YES
Request Body	-----
Returns	<pre>{ id: user.id, name: user.name, email: user.email, status: user.status }</pre>
On Error	400/404

Resource	/api/user/(:id)
Method	DELETE
Authenticated	YES
Request Body	-----
Returns	<pre>{ id: user.id, name: user.name, email: user.email, status: user.status }</pre>
On Error	400/404

Resource	/api/user/{:id}
Method	DELETE
Authenticated	YES
Request Body	-----
Returns	<pre>{ id: user.id, name: user.name, email: user.email, status: user.status }</pre>
On Error	400/404

Resource	/api/message
Method	POST
Authenticated	YES
Request Body	<pre>{ text send_to }</pre>
Returns	<pre>{ id, text, creation_date, send_from, send_to }</pre>
On Error	400/404

Resource	/api/messages
Method	POST
Authenticated	YES
Request Body	<pre>{ text: "text" }</pre>
Returns	<pre>{ messages_array: [{id, text, creation_date, send_from, send_to}]}</pre>
On Error	400/404

Resource	/api/post
Method	POST
Authenticated	YES
Request Body	{ text }
Returns	{ id }
On Error	400

Resource	/api/posts
Method	POST
Authenticated	YES
Request Body	-----
Returns	{ g_posts: [{id, text, creation_date, creator_id}]} }
On Error	-----

Resource	/api/post/{:id}
Method	DELETE
Authenticated	YES
Request Body	-----
Returns	{id, text, creation_date, creator_id}
On Error	400/404
